

# 7 Other Playback Solutions

## INTRODUCTION

Antipodes Music Servers offer a range of other playback solutions. In general these other playback solutions are not going to provide you with the same sound quality as the Roon, Squeezebox and MPD solutions.

But you may wish to use another playback solution to meet a particular need or to work with a particular device.

For most customers these other playback solutions are a secondary use of their Antipodes. For example, you might use your Antipodes with Roon to play direct to a DAC in your main system. But a secondary use might be to play from the library on your Antipodes through a SONOS system.

In most cases the relevant applications are available for your Antipodes but you need to install them first. Go to Section 8 to learn how to install them.

These include:

**DLNA/UPnP/Open Home Solutions.** This includes MinimServer and BubbleUPnP Server. These enable the Antipodes to be used as a DLNA server for DLNA renderers that you already have in your network.

**Plex Media Server** (Video, Music, Images etc). This enables serving video, provided you have a Plex player to stream to.

**SONOS Integration.** This enables your Antipodes to be a music source for your SONOS system.

**HQPlayer NAA.** This is a special purpose renderer application, to play from HQPlayer running on a Windows or Mac computer.

The rest of this section will get you started with each of these but you may need to visit the developer's site to get a detailed guide on how to meet your needs.
